Dear Dale Alcock Projects Team

Insight Early Learning has a big vision, that is to offer high quality early learning services for children. Our dreams are big and we want our buildings to be outstanding! We want to offer our children sophisticated environments that are aesthetically beautiful. In turn, we recruit high level experienced teams to deliver educational programs that offer the best in quality care for children. We are delighted to have engaged the Dale Alcock Projects team to build our Freo Kids Early Learning Kelmscott Centre located on Albany Highway.

The Dale Alcock Projects team went above and beyond to deliver a building that exceeded our expectations – they took time to talk the project through with us to build their understanding of how children and our teams would use the building.

Keeping the bottom line firmly in sight, the Dale Alcock Projects Team made thoughtful suggestions on where we could save money across the project and also where we should invest more to produce a quality outcome. They understood that children must be offered a safe environment to grow and thrive – they were prepared to take feedback and be open to ideas on how the building should and could safely accommodate children while creating inspiring learning spaces.

Lloyd our Project Manager and Anna our Project Co-ordinator worked with us to fully understand the specific requirements of what a quality education and care service looked like and at all times we felt as if we had truly partnered with a company who cared about the outcome. They took the time to save the trees in the yard that will now offer a playscape filled with shade and were always so welcoming when we visited the site throughout the project.

The positive culture that thrives across Dale Alcock was evident at the conclusion of the project when all the various Dale Alcock site managers were invited to come and view the building – celebrating the success of Anna, Lloyd, Shane and the team. This positive culture was reflected in the sub-contractors who became engaged in the project, the painter who cared about the low VOC easily cleanable paint, the enthusiasm of framing company that supplied the frames and trusses, the landscapers who produced such a wonderful external playground for children right down to the fencer who built us a truly wonderful jarrah fence.

The end result is a building and landscape that is aesthetically pleasing, filled with light and built with love.
